TECHNICAL PROJECTS

Gobbler 🦃 - [GitHub](#) | [About](#)

Celebrate by contributing to a sponsored charitable cause. Interact and discover what Thanksgiving is all about.

- Designed a React client side for visual interaction and exploration
- Made use of container components and functional components to store state, and display stateless UI when needed.
- Incorporated Redux + Thunk middleware to ensure a smooth flow of state
- Engineered a Rails API with SQLite to perform CRUD actions

Retro Pad 🎮 - [GitHub](#) | [About](#)

Old school Palm Pilot clone with a pop art inspired color palette

- Used solely React/fetch requests per container over Redux to explore fundamental hook usage.
- Sass/React Bootstrap implementation for visually vibrant and modern feel
- Rails API/SQLite backend to store user created data

Turtles-App 🐢 - [GitHub](#) | [About](#)

Who doesn't love pizza? Feed a turtle your favorite classic (or obscure) pizza slices.

- Created a user friendly single paged HTML, CSS, and JavaScript front end application
- Featured Object Oriented JavaScript to encapsulate related data and behavior
- Fetches object data and encapsulates back-end data in JSON.

WORK HISTORY

Lincoln Financial Group - Case Manager

2018

- Conducted investigations to determine whether or not to accept liability and to what degree - approved or denied benefits accordingly and had hands on work with a great deal of data
- Provided excellent customer service, including helping customers with any troubleshooting issues.
- Regularly maintained lowest pipeline of claims on the team through an organized plan of action with the customer.

MetLife - Case Manager

2017-2018

- Proactively would communicate with each claimant to set expectations, assess medical and non-medical barriers to return to work, and kept him or her fully aware of the claim status through professional communication.
- Earned contract extensions due to the ability to make a positive impact on project goals.
- Received additional job duties to aid with other departments due to maintaining a steady work load.
