TECHNICAL PROJECTS

Gobbler🦃 - GitHub | About
Celebrate by contributing to a sponsored charitable cause. Interact and discover what Thanksgiving is all about.
• Designed a React client side for visual interaction and exploration
• Made use of container components and functional components to store state, and display stateless UI when needed.
• Incorporated Redux + Thunk middleware to ensure a smooth flow of state
• Engineered a Rails API with SQLite to perform CRUD actions

Poke-TM ⚡ - GitHub | About
In this pokedex like app, become a pokemon master and link your team the TMs they'll need for battle.
• Explored, learned, and created the making of a Rails application
• Implemented User/password authentication using bcrypt and omniAuth
• Made use of nested resources with the appropriate Urls

Turtles-App🍕 - GitHub | About
Who doesn't love pizza? Feed a turtle your favorite classic (or obscure) pizza slices.
• Created a user friendly single paged HTML, CSS, and JavaScript front end application
• Featured Object Oriented JavaScript to encapsulate related data and behavior
• Fetches object data and encapsulates back-end data in JSON.

WORK HISTORY

Lincoln Financial Group - Case Manager   **2018**
• Conducted investigations to determine whether or not to accept liability and to what degree - approved or denied benefits accordingly and had hands on work with a great deal of data
• Provided excellent customer service, including helping customers with any troubleshooting issues.
• Regularly maintained lowest pipeline of claims on the team through an organized plan of action with the customer.

MetLife - Case Manager   **2017-2018**
• Proactively would communicate with each claimant to set expectations, assess medical and non-medical barriers to return to work, and kept him or her fully aware of the claim status through professional communication.
• Earned contract extensions due to the ability to make a positive impact on project goals.
• Received additional job duties to aid with other departments due to maintaining a steady work load.

EDUCATION AND SKILLS

Flatiron Full Stack Immersive Program   **2019**
Full Stack Development, JavaScript and Ruby on Rails immersive program

Codecademy Intensive   **2018**
Front End Development, HTML, CSS, and JavaScript online program
